

Copyright in Gene Sequences

Mark Engelman

Head of Intellectual Property Hardwicke, UK

Abstract:

Introduction: It has long been envisaged that Intellectual Property protection in the form of copyright rather than patent be available to DNA sequences.

Conclusion: Copyright Protection may indeed be available.

Keywords: Copyright and Gene Sequences

Biography:

Professor Mark Engelman is a specialist Intellectual property barrister, having qualified as a pharmacologist, he then qualified at the English bar and has practiced in intellectual property for 30 years. He was appointed Research Associate to St Edmunds College Cambridge and Associate Professor of Intellectual Property to Notre Dame University. He is a Master of The Hon. Soc. of Gray's Inn.
