We invite you to submit your articles to the journal so that they can reach a global audience, as we have a readership of over 100 million individuals. through our social media platforms such as Twitter, LinkedIn, and Google.

### Authors can also submit papers in the following fields:

**Cysts and Ovaries:** Cysts are sacs filled with fluids that can encircle the ovaries. They are completely ordinary. During the

reproductive years, they are extremely regular. The most well-known is a practical expansion. It forms during ovulation. When either the egg is not discharged or the sac containing the egg structures does not disintegrate after the egg is expelled, this configuration occurs.

**Ovarian Cancer:** Progressing pain or difficulties in the gut or back, abnormal vaginal dying, illness, and bloating are all warning indications of ovarian cancer. Surgery and chemotherapy are used to treat ovarian tumors, depending on the stage of the cancer.

**Womb Cancer:** Womb cancer is a type of cancer that begins in the uterus and spreads throughout the body. In women, the uterus is the empty, pear-shaped pelvic organ where embryonic development takes place. Womb cancer begins in the layer of cells that surrounds the uterus's lining (endometrium).

**Reproductive Cancer:** Cancer can develop in the vulva, vagina, cervix, uterus, fallopian tubes, or ovaries, among other places in the female reproductive system. Gynecologic cancers are the name for these tumors. Gynecologic cancers can target nearby tissues and organs or spread (metastasize) to distant sections of the body via lymphatic tubes and lymph hubs (lymphatic framework) or the circulatory system.

I would like to thank all of the authors, reviewers, and other supporter groups for their contributions to the final editing of the published articles, as well as the editorial assistant's help in resolving Insights in Gynecologic Oncology concerns in a timely manner. I am grateful to all authors, reviewers, and supporters for encouraging me to value the effort and success of other organizations that enable me to effectively publish articles.
