Editorial Note

Journal of infectious diseases and pathology is a peer reviewed journal with open access. This journal consists of editorial board welcoming the editors to take part with our journal. With submission of the paper of recent research or article written by the different authors. The journal consists of volumes and issues where each volume containing issues and each issue consists minimum of five articles. This journal describes about the infectious diseases and the pathology in detail. In this pandemic situation every individual has to go through different perspectives to save one's own life, whereas we are landing in the danger zone of the pandemic. It is not that easy to escape from any disease unless until we know a minimum biology of that particular disease. When coming to pathology it is the study of the disease cause and of injury and effects. A person dealing with pathology is called Pathologist. Pathology is of two different types clinical pathology and anatomical pathology. Later depending on the evolving era, it is divided into several other branches like cytopathology, hematopathology, and histopathology forensic pathology. The clinical and anatomical pathology are used in the medical diagnosis of the disease and more about the disease. The clinical pathology deals with the medical diagnostic procedures without any surgery whereas the anatomical pathology deals with the surgery of the removal of the organ or a small part of the particular organ is extracted for the further diagnostic procedure to identify the disease and cause of the disease. The anatomical pathology where the surgical procedure is carried out with some of the pre diagnostic procedures to observe the patient health condition so as to carry out the anatomical procedures. Which involves the pre anaesthetic preparation the anaesthesia is administered through IV either general or centralised i.e. the total body.

Journal of infectious disease and pathology (JIDP) dealing with articles on different aspects like fever, mycosis, lower respiratory diseases, measles, ophthalmic diseases, infectious diseases in obstetrics and gynecology, cysticercosis, dengue fever, histoplasmosis, lassa fever, norovirus infection, tularemia, west nile virus infection, cholera, cryptococcosis, diphtheria, ebola hemorrhagic fever, listeriosis, shigellosis, swine flu, and stomach flu etc. Journal of Infectious Disease and Pathology which is using Editorial Manager System for maintaining the quality in review process. Editorial Manager is an online manuscript submission, review and tracking systems used by most of the best open access journals. Review processing is performed by the editorial board members of journal or outside experts. The journal has the option for the authors to submit their paper or article through the link provided as submit manuscript link. It also provides the access for the authors to check the given paper.

The journal contains a special issue, The special issue aims at exploring new, relevant, and most compelling dimensions within the domain of Infectious Diseases that missed a mention in the journal on a regular basis. Proposal Preparation Special issues will be released on a monthly basis and proposals will be accepted accordingly. The special issue contains Editorial Board members and there is also the role of Guest editors in the special issue, there is a special issue release process. Once accepted and published, all special issues will be released under an open access system through OMICS International and will be freely available for reading, downloading, and printing.
