Editorial Note

The New Year promises many exciting developments for [Cellular and Molecular Biology](#). Popularity of the CMB can be ascertained by the reader's interest, curiosity and support, which is estimated from the response we have been receiving from diverse geographical regions all across the world. This is further ratified by the Google Analytics metrics that analyses and releases our reader's profile from time to time. Moreover, the number of citations per year continues its robust rise as articles enjoy increasingly broad dissemination..

On behalf co-editors, I am glad to present the successful journey of the journal upon the completion of sixty five years milestone of establishment in 2019. Till 2019, journal received a number of papers, out of which 15-20 % articles were rejected in the preliminary screening due to plagiarism or being out of the format. More than 100 articles were subjected to the peer-review process and 65 of those were [accepted & published](#) in journal.

As a Scientific Open Access journal, the objective of CMB is to publish the latest advancements in cellular and molecular biology, molecular genetics, cell biology & metabolism, cell dynamics, cell regeneration, cellular signaling, gene profiling, molecular biotechnology etc.

Authors are cordially invited to submit their current research activities and outcomes in the form of any article type of science communication such as original research, review, expert opinion, commentary, short note communication to our Journal.

Manuscripts can be submitted online via [Editorial Tracking System](#) or as an E-mail attachment to the Editorial Office at editor@omicsonline.com. CMB JPCIC is using Online Review and [Editorial Tracking Systems](#) for quality review process and the authors can submit manuscripts and track their progress.

The Journal is publishing open access articles on cellular and molecular biology.
