

Editorial Note for Addiction Research and Therapy

Richard G. Heimber*

Thaddeus L. Bolton Professor of Psychology and the Director of the Adult Anxiety Clinic of Temple University

Journal of Addiction Research & Therapy is an academic journal which aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of Research articles, Review articles, Case reports, Short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide.

Turning over this volume of wide-ranging research reports, whilst maintaining quality, presents a significant challenge.

Addiction Journal is an official peer reviewed journal for the rapid publication of innovative research covering all aspects of addiction and its related disorders. Addiction Journal with highest journal impact factor offers Open Access option to meet the needs of authors and maximize article visibility.

Addiction Journal includes a wide range of fields such as Addiction Recovery, Drug Rehabilitation, Substance-Related Disorders, Facts About Alcoholism, Drug Addiction Treatment, Psychiatric problems behind addiction, etc., in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing.

This peer reviewed medical journal is using Online Submission System for quality in review process. Online Submission System is an online manuscript submission, review and tracking systems. Review processing is performed by the editorial board members of Journal of Addiction Research & Therapy or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript. Authors may submit manuscripts and track their progress through this system, hopefully to publication. Reviewers can download manuscripts and submit their opinions to the editor. Editors can manage the whole submission/review/revise/publish process.

Journal of Addiction Research & Therapy is an academic journal which aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of Research articles, Review articles, Case reports, Short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide.

Drug Rehabilitation

Drug rehabilitation is also called drug rehab or simply rehabs, is a way of medically or psychotherapeutic management of the addict person, for its dependency on psychoactive elements such as alcohol, prescription drugs, narcotic drugs like heroin, morphine, amphetamines (methamphetamine). The main purpose of drug rehabilitation is to ensure that the addict person start to cease substance abuse, in a way to dodge the psychological, legal, financial, social, and physical concerns; that can be triggered, especially by extreme abuse.

Alcohol Addiction Treatment

Alcohol addiction, also known as alcoholism, is a well-known disease that disturbs people of all way of walking in life. Many people with alcoholism hesitate to get treatment because they don't recognize they have a problem. Treatment for alcoholism may consist of: A drug called disulfiram may help to prevent you from drinking, although it won't cure alcoholism or remove the compulsion to drink. If you drink alcohol, the drug produces a physical reaction that may include flushing, nausea, vomiting and headaches.

Drug Addiction Treatment

Drug addiction is a complicated disease, and withdraws takes more than good intentions or a strong dedication, because drugs change the brain in ways that encourage compulsive drug abuse, withdraws is difficult, even for those who are ready to do so. Drug treatment is proposed to help addicted personalities to stop compulsive drug looking and consumption. Treatment can take place in various ways, take many different forms, and last for long period of time. Drug addiction is characteristically an enduring disorder described by occasional relapses, a short-term, one-time treatment is usually not appropriate.

Heroin Addiction Treatment

Heroin (diacetylmorphine or morphine diacetate) also known as diamorphine. It is an opioid analgesic found naturally from the opium plant and common people also known him as smack, brown sugar and black tar. Heroin is exceptionally addicting and more challenging than some other addictions to overwhelmed, but however heroin recovery is conceivable. Drug like Buprenorphine is a medicine used for treating heroin addiction. Buprenorphine works same as methadone drug. Buprenorphine avoid heroin from getting you "high" and breaks withdrawal symptoms and heroin appetite, Heroin Addiction and Related Clinical Problems.

We would like to thank the editors and reviewers of Journal of Addiction Research & Therapy. We thank all the authors for contributing their outstanding manuscripts to Journal of Addiction Research & Therapy. We also thank all reviewers and the editorial team of Journal of Addiction Research & Therapy for helping us to form this issue and ensuring the high quality of publication.
