

# Editorial Note|Transplant Reports : Open Access

## **About the Journal**

The Journal of Transplant reports is a Scholarly Open Access journal that addresses current, ongoing research and state of the art review articles related to all types of organ and tissue transplants. It has been started with the zeal to advance the research in the field of transplant. Our vibrant Editorial Board Members provide a unique platform for researchers to improve their research.

The Journal of Transplant reports provides the researchers and doctors with the recent techniques available in the field of transplant and helps to bring together scientists of same research interest in order to accelerate the growth of transplant research. Our main objective is to accelerate the growth of transplant by bringing together people with research interest in transplant. We encourage researchers to submit their paper in areas including, but not limited to Kidney transplant reports, Allografts transplant reports, liver, and pancreatic transplant, individual organ transplants.

## **About the Conference**

The conference International Conference on Organ Donation and Transplantation Science hosted by Conference Series was successfully completed which was held during April 09-10, 2020 with the theme Organ donation issues and management during Covid-19. Benevolent response and active participation was received from the keynotes, speakers, chair persons and delegates as well as attendees from the Scientists, Doctors, Professors, Pharmaceutical Industries, Healthcare Industries, Researchers and Students from the fields of molecular biology and genetics. those who involved in this successful event.

The Speaker of the event are

1. Title : Organ transplantation

Dr. Sudha bansode, India

2. Title: Malignant hyperthermia in a paediatric renal transplant :A case report

Dr. Nidhi, India

The highlight of the conference were Organ transplantation, lung transplant, kidney transplant, kidney rejection, organ donation, skin grafting, stem cell transplantation, drug delivery in transplantation.

## **Why Special Issue**

This special issue has been introduced to recognize those researchers who are with us from the starting of the Conference and kept their belief with us regarding the quality of the conference

and the publication. Their continuous support make the Conference as well as the supporting journal to the conference successful and recognized by the international experts. Here in honor to those supporters, those speakers, those submitters, those researchers we are releasing the special issue with the abstracts accepted for the conference, full length articles submitted to the conference and with the short communication submitted to the conference.
