Introduction

Health care and prevention journal belongs to omics publisher. This omics was established in 2007 it publishes all the peer reviewed articles in biomedical and clinical field's, medical, pharmaceutical, life sciences, business, engineering and technology.

The journal archive page consists of several issues started from 2018 about the Health care. Our journal consists of eminent authors like scientists, academicians, medical professionals; our journal assigned to digital object identifier and all articles were indexed. Journal of Health care and prevention talks about the overall world of medicine that studies the interaction between the system It also handles with the research of high grade aspects of experiments that encompasses chronic diseases, Essential health care, Mental health disorder, preventive health care, women health care and that I am grateful to announce that I even have released 4 issues till now and people all are published well with in time and it takes about one month for the entire process of publishing an article.

This journal may be a peer reviewed open access journal which provides rapid and reliable source of data within the sort of original articles ,case reports, review articles, short communications etc. Our journal always encourages the authors to share their ideas and their valuable research work associated with Health care and prevention. The Journals aims to take care of the standards in research and practice, provide platform and opportunity to all. Any new authors who want to explore within the field of prevention, diagnosis, care, recovery or cure of disorders interactions across the biopsy are encouraged to submit their research work.

The related journals to the present health care and prevention are Health Care: Current Reviews, International Journal of Public Health

and Safety, Journal of Health & Medical Informatics, Nursing and Care. This journal main aim is to encourage and publish the research articles with the outstanding medical importance and theirs is a limit of length of the article according to the article type. Our journal gives all the updates regarding the manuscript submission on time to the author. If the author has any queries regarding the submission the galley proof those queries are rectified immediately. Our journal is visited by numerous users this shows their interest towards our journal the fast and efficient publishing standard set by the omics is extremely impressive by the reader base and it's well appreciated. Health care and prevention publishes in scheduled time.

The reviewers of this journal are very active and they immediately give their opinion on the article and this helps to amped up the process. I would also wish to express my gratitude to all or any the authors, reviewers, the publisher, the advisory and therefore the editorial board of health care and prevention, the office bearers for his or her support in bringing out yet one more volume of health care and prevention and appearance forward to their unrelenting support to bring out the quantity of health care and prevention in scheduled time. Our journal main motto is to share the research work submitted by the researches, through online to all over the world and the published articles are always available in the official website of our journal.
