INTRODUCTION

Bacteria causing healthcare-associated infections often start in the oral cavity. Patients are randomizing to receive enhanced dental care provided by a dentist, or to receive routine oral hygiene performed by the ICU nurse staff. Enhanced dental care included teeth brushing, tongue scraping, removal of calculus, atraumatic restorative treatment of caries, tooth extraction and topical application of chlorhexidine corresponding to each patients' needs four to five times a week. Comparatively, regular treatment consisted of mechanical cleansing using gauze followed by topical application of chlorhexidine three times a day. Many of us believe that they have to ascertain a dentist's long as they're in pain or think something is wrong, but regular dental visits can contribute to a lifetime of excellent oral health. I'm pleased to specify that during the year 2020, Journal of Oral Hygiene and Health (JOHH) has effectively distributed its eighth volume and has delivered 4 issues for each year immediately. I am gratified to mention that we are going to release new issue (volume 9, issue 3) by the end of March, 2021. JOHH is having the Index-Copernicus estimation of 84.15 and Journal impact factor is 0.72*. Alongside these JOHH is contain its NLM-ID as 101647653 and its International Standard Serial Number (ISSN) as 2332-0702. In excess of 50 well prominent experts all through the world were acting as Board of editorial for our journal. More than 250 articles were submitted which incorporate Review, research articles, case reports, short communications and so forth. In a normal the article acknowledgment or dismissal will be

educated to writer inside 21 to 30 days of initial submission while the preliminary quality check result will be recognized inside 24 to 48 hours of early submission. For simple contact of authors, JOHH has given whatsapp contact number in our home page so that authors can contact easily for any questions or concerns to editorial assistant. Editorial, Review, and Manuscript tracking system was introduced for easy tracking of the manuscript by author, editor as well as publisher. Authors can track their manuscript easily by utilizing provided credentials during the period of submission. In 2020 JOHH is endeavor to procure quality articles identified with dental points, for example, progressed Bleeding Gums, Receding Gums, Coronal Fracture, Dental Anesthesia and Sedation, Dental Plaque, Dental Radiology, Dentistry and Diabetes, Gum Cancer, Gum Infection, Occlusal Splint, Oral Hygiene Blogs, Oral Hygiene Case Reports, Oral Hygiene Practice, Oral Leukoplakia, Orthodontist, Periodontology, Root Canal Treatment, and so on. Researchers note that enhanced dental treatment, including oral antiseptics routinely performed in ICUs could be more effective in reducing the oral bacteria and help prevent migration of these bacteria into the lungs. Indeed I might likewise want to offer my thanks to all authors, reviewers, the publisher, the advisory and the editorial board of JOHH, the workplace conveyors for their help in bringing out one more volume and anticipate their tenacious help to draw out the Volume 9 issue 3 of JOHH in planned time. We guarantee the entirety of the readers that we do our level best in this long term.
