

Global presence of your research at Waste Recycling Congress 2020 scheduled during July 20-21, 2020 at Osaka, Japan.

Ajah James Uzoigwe

Founder/President Earth Environment and Climate Care Ambassadors (EECCA), Nigeria, E-mail: jcitycleanersinternational@gmail.com

The global waste management market size is expected to reach \$484.9 billion by 2025 from \$303.6 billion in 2017, growing at a CAGR of 6.0% from 2018 to 2025. Waste management is the collection, transportation, and disposal of garbage, sewage, and other waste products. It involves treatment of solid waste and disposal of products and substances in a safe and efficient manner.

The growth of the global waste management market is driven by increase in adoption of proactive government measures to reduce illegal dumping. In addition, surge in population and increased globalization has led to rise in the overall waste volume, worldwide. The urban population produced about 1.3 billion tons of municipal solid waste (MSW) in 2012, which is expected to grow to 2.2 billion tonnes by 2025. Moreover, increase in industrialization in the emerging economies, such as India, China, and Taiwan, has led to the development of chemical, oil & gas, automobile, and medical industries, which generate enormous amount of waste and cause pollution. These factors are expected to significantly contribute toward the growth of the global market. However, high cost of procuring and operating waste management solutions is expected to hamper the market growth. Conversely, increase in awareness among public and government agencies about these solutions and upsurge in need to develop waste-to-energy solutions are expected to provide lucrative growth opportunities for market players during the forecast period.

Key Benefits for [Waste Management](#) Market:

The report presents an extensive analysis of the current & emerging market trends and dynamics in the global [waste management](#) market.

In-depth analysis is conducted by constructing market estimations for the key segments between 2017 and 2025.

Extensive analysis of the market is conducted by following key product positioning and monitoring of the top competitors within the market framework.

A comprehensive analysis of all regions is provided to determine the prevailing opportunities in these geographies.

Key players within the waste management market are profiled in this report, and their strategies are analysed thoroughly, which help to understand the competitive outlook of the global market.

Target Audience:

- Recycling and Waste Management industries
- Recycling Associations
- Directors, CEO's of Organizations
- Chemical Engineers
- Environmental Academia's
- Business Development Managers
- Chief Scientific Officers
- Recycling Researchers
- Professors, Associate Professors, Assistant Professors and PhD Scholars
- Investment Analysts
- Recycling and Waste Management Professionals

Related Companies/industries:

- Bureau of International Recycling
- Stena Recycling
- Flora Recycling Company
- Waste Ventures India
- LAR Process Analysers
- Asia Recycling (Pvt) Ltd

Related Associations and Societies:

- Alabama Environmental Council
- Alabama Recycling Coalition
- Alaskans for Litter Prevention and Recycling (ALPAR)
- Interior Alaska Green Star
- Arizona Recycling Coalition
- Envirotech Asia
- Economic Integration and Recycling in Asia
- Waste Management and Recycling Association of Singapore
