

## Implications of Case Reports in Development of Traditional Medical Treatments

**Said Moustafa M Eldeib**

*Department of Pediatrics, NMC Healthcare Group, Abu Dhabi, UAE*

We are glad to announce our “11th International Congress on Clinical and Medical Case Reports” which will be held during **September 14-15, 2020 in Vienna, Austria**, under the theme: “**Accomplishing the Drastic Improvements in Healthcare to Reach New Heights**”.

### Global Market Share

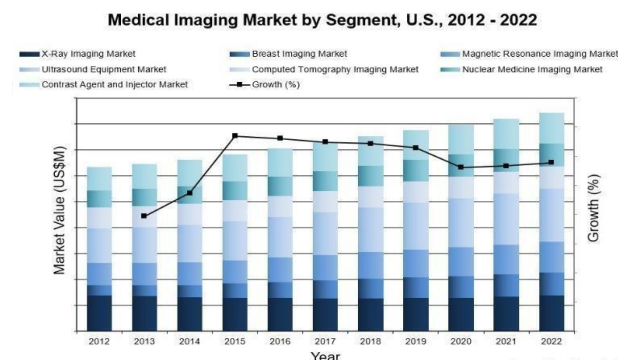

The manufacturers in Europe control most of the domestic medical device industry, but the currently market is relying on the import from the markets across the world. Medical device imports accounted for about \$3.8 billion in 2015, more than 50% of the overall market. The medical device packaging market in Europe is expected to grow at a CAGR of more than 7% by 2018-2022. There were approximately 1.8 million physicians working in the Europe. The overall number of physicians which are practicing in Europe were recorded in the largest Europe Member States were: Germany (3, 33,000), followed by Italy (2, 36,000), France (2, 06,000), the United Kingdom (1, 81,000) and Spain (1, 77, 000).

### Market Report:

The French demand for pharmaceutical and medical products is the second largest market in Europe and the 5<sup>th</sup> largest market in the world. The French market was estimated at US \$14.5 billion in 2014 and growth is expected to be modest, hitting US \$16.5 billion by 2019.

### Members Associated with Medical Case Reports:

Members which are commonly associated with the conference medical case reports are the health professionals like Physicians, Surgeons, Dentists, Physiotherapists, Nursing Professionals, Pharmacists.

### Global Business Value:

The growth of the market is attributed to the increasing adoption of digital pathology to boost research laboratory potency, rising prevalence of cancer, growing applications of digital pathology in drug development and companion medicine, easy consultation and increasing initiatives by governments and business players.

The marketplace for anatomic pathology worldwide can doubtless rise at a gentle pace of 6.5% during the period from 2017 to 2025, predicts a report by Transparency Market Research. At this pace, the market is projected to clock a price of US \$30,314.5 mn by 2025- end from US \$17,318.0 mn in 2016.

Depending upon product and services, the global market for medical pathology can be segmented into consumables, instruments and services. The services phase, among them, leads the market at present on account of the rising instances of critical illnesses needing urgent medical attention. In 2016, it accounted for a major 45.9% share in the market.
