

# Market Analysis on Worldwide Forum on Otolaryngology and ENT Surgery

## Michael Vitek

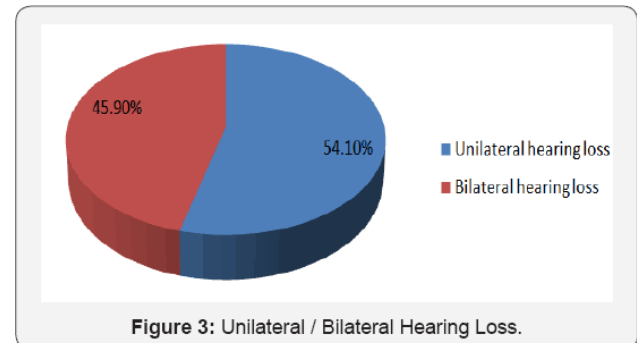

Medical director, Autonomous University of Guadalajara, Villahermosa, Tabasco, Mexico, E-mail: mvitekresilio@gmail.com

After the successful completion of the **ENT Surgery** conference series, we are pleased to welcome you to the **"Worldwide Forum on Otolaryngology and ENT Surgery."** The congress is scheduled to take place on August 24-25, 2020 in the beautiful city of Barcelona, Spain. This 2020 [Otolaryngology](#) Conference will give you exemplary experience and great insights in the field of research.

According to this research report, the global market for ENT Surgery is projected to show a robust growth of 6.5 per cent in the CAGR during 2019-2024.

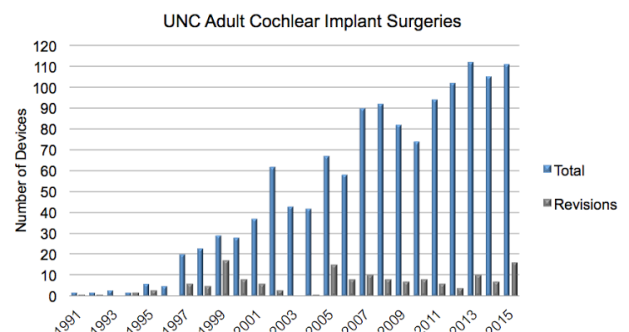

Immunosuppressive drugs hold Hanging patient profile dynamics during [ENT Surgery](#) has stimulated the growth of transplantation diagnostics in the market. Furthermore, the hanging dynamics of patient profiling during Orthopedics Surgery have stimulated the growth of Surgery diagnostics on the market. Transplant diagnostics products are expected to see significant growth on the back of an increasing number of organ donors.

Organs that have been successfully transplanted include the heart, kidneys, brain, liver, lungs, pancreas, intestines, and thymus. Approximately 2,200 lung transplants have been performed worldwide every year since 2000 and beyond. Between 2000 and 2006, the median survival period for patients with lung Surgery was 5-and-a-half years, which means that half of the patients survived for a shorter period of time and half survived for a longer period of time.

In China, kidney transplantation is about \$70,000, liver \$160,000, and heart \$120,000. Although these prices are still unattainable for the poor, compared to the fees of the United States, where a Orthopedics Surgery may be required.

ENT Surgery is the most commonly performed ENT Surgery in the world. It has gained widespread popularity by improving the outcome of patients with end-stage

---

renal disease. With advances in Orthopedics Surgery methods and improved transplant success, kidney transplantation is now widely considered to be the best way to treat chronic kidney disease for many people.

In 2018, the global market for Orthopedics Surgery was 67 million US\$ and is expected to reach 86 million US\$ by the end of 2025, with a CAGR of 10 per cent between 2019 and 2025.

In recent years, the market for ENT Surgery has seen significant growth directly on the back of the increasing

number of procedures for ENT Surgery. In addition, an increase in the rate of Bone Health and an increase in the prevalence of chronic diseases is expected.
