

## Reward Law

Dora Dragoni\*

Acupuncture Fellow at AMAB (Association of Medical Acupuncturists of Bologna), Italy

### Reward (Neurophysiological) Basis

To understand why having laws is fundamental to lead a right existence, a happy couple life, and a good world equilibrium.

The main bad from good distinguishing dates back to the origin of human thought, and is intrinsic on our brain functions: medial reward with life centres basic to breathe and have right bpm heart physiology (IV chakra), then nutritional needs (III chakra), and more than yuan qi necessities, the I+II chakras meaning a right Jing equilibrium basis for all qi and shen too (VI+VII chakras).

All this are life functions meaning that we have to accomplish them at best and to guarantee them for world. When this is missing dopamine is converted by external stressful stimuli (the BEN) by dopamine beta hydroxylase (see all our bibliography) into negative molecules catecholamine's that are cause of stress somatizations, that as all occidental updated ideas it's the risk of start of all nowadays categories of disease like atopies, auto immunities and allergies, endocrine-hormonal dysfunctions, dysautonomias at heart and gastro-enterical system, and then all we can relate to wellbeing withdrawal, that is due to an antireward condition to solve. So, laws are the main safety way we have to know, have, update and release to guarantee and assure for us, future, society, planet, so that life can be an equilibrated path with beneception for all.

### Microdamage Chapter

In this chapter, we talk about a new law example related to the so called COLPA GRAVE COLPA LIEVE that are the small errors (or crimes) vs. laws that is vs. human rights, that summed can become a risk for our existence conditions and life wellbeing, till that they become as an amount like real crimes to be solved and compensated till the elaboration of a safer better lifestyle.

As told, any crime any behaviour against our life right and need is prosecutable for actual current laws, then any other interaction that leads us to negative directions risks feelings can be called microdamage. Microdamage is for example when we talk positively of us with a friend and this answers in cold way, or in negatively hyronical way, or in acid smiling way; when we send a message to a friend and these answers intentionally with delay, when we are in need and the counterpart falsely declares to be busy or sick again, when we ask for why person missed that help back for us and that person falsely answer when counterpart always is in need and when we ask a turnover for us too the answer is no now I cannot and then or disappear or again asks toward us.

When we truly talk and the person uses false tones to answer.

When we have a reward from life and another person is jealous in expressions or in worlds or "trivialize" meaning this that she minimizes what we got deserved way.

When then we are in discomfort and those persons smile against.

When we are forcefully asked to offer what we have as eating or as study notes and persons then fortified pretend some or smile against.

then such persons when we start understanding how friends they are in such ways not as we for sure, then they start talking against

envying where we live or what we study since they did a worst life going out having fun drinking wine and kissing everywhere or changing boyfriends even too microdamage is when we are forced to meet persons we don't want we don't like we are not believing as, when we have to talk against our will when we have to smile not as we think when we have to faint to be children when we grew up and so on.

Microdamage is then all this translated into wedded life again after the efforts we did we have to be good children whilst our parents did crimes against, when we have to omit why we have stress signs in our body and soul, when we have to hear that we are false by the husband relatives, when someone says that we have too much cultures and they smile against, when we respect others and they only judge to feel better because thinking to persons younger than us usually makes us feel better, and when we have to give money as gifts to all persons mentioned since we know that coalizations of persons become a concrete damage for anyone, and eventually when we are forced to live in negative ways with error rules and then we are judged for what we are not.

All this is microdamage since we cannot call mafia nowadays too what is related to family to false cultures, being culture what elevates us, and we cannot call mafia what is only synchronicity what is only dissacrating not in yet demonstrating in scientific ways, and what is safe sure perceptions of what we know.

The only strategy to solve this is:

1. Distinguishing bad from good
2. Understanding which persons and why have negative behaviours etc. And avoid them
3. In case of reiterations or similar, proceeding toward laws, local laws, elaborating better rules.

The main crimes I'm talking about are:

- Ingiuria, when we talk or act against a person in presence, 1 year in jail
- Diffamazione, same but person not in presence, 2 years in jail
- Molestia, acting maniacally physically against a person, seen the grade of crime
- Minaccia, talking with damage against a person, 1 year in jail
- Mafia, when 3 or more persons are in that context associated against one, 7-14 years in jail and worst ones see laws existing

and to be relating this to human rights we can say that when we accumulate damages our life system is modified negatively from electrical and chemical points of views so that automatically uncultured persons tend to reiterate old previous past wrong behaviours like those mentioned since this is the electrical interactions between brains see their electric field such as registered by EEG and more studies in elaboration and that will.

This explains why human rights are to assure since persons have free will are able to understand and have right willing so that they can and have to choose how to talk and behave toward people if so okay if errors they are judged and solved.

So, it's clear what is the human rights human needs situation, as told when our reward system life time human phases are active from physiological point of view from couple interactions too, we are to be safe so that we can and have to choose environments behaviours and any other related to our life love couple and existence chosen to get, we are in fact to be safe and secure that we can lead the life we want need and deserve.

For these reasons:

1. Local authorities have to a. correctly guarantee right judgments without projecting their inner older overcome life traumas in populations as some extreme oriental chiefs that make laws against drug traffickers or any other minorities crimes that their family genes have as "balanced ethnic budget" to affirm, being this a humanity crime scene the intensity or quantity of persons affected by them seen human rights minimal to be assured for anyone involved b. and then assure human needs to be like basic foods seen how agriculture and local fields properties by family nuclei etc. and more soil country and similar regulations to get real and world organization have to diffuse that neuroscience is not a theoretical knowledge to be done in a lab to study new receptors for which technologically advanced new economically good targets for drugs companies or similar, but it's a science at service of humanity of which we are part as this life is, and since we are in natural synchro with all the people being as we are populating our planet.

2. So, my wellbeing has to involve all wellbeing too, not in only concrete terms but for sure in general ways, so that what I do determines good consequences for all, see how we can synthesize human rights.

Going back to practically ideas to guarantee in terms of human rights.

We can say that as symbol sums up.

1. Food is a human right, being this part of reward system as main one, being this already recognised a human right, see now whys, see the more we empower people the best they can reach a human standard to live this. As told has to be done in local organizations of soils so to permit to anyone a good diet as wrote,

2. Fitness to is a human right see balancing inactivity and hyper-work, and also seen that in nature male and female BMI are often almost similar, guaranteeing this a omogene equilibrium in the couple and family,

3. Then mind relaxation time is mandatory to have since its basis to destress in inner way and its fundamental to assure health for person and people since as we described salutogenesis it's important to before assuring human needs then permit in a small minor percentual other kind of medial help.

4. Love life is basis for society meaning a theoretical group of persons since people is dynamic see people migrations in order to reach their environment their life their projects to be, love life is basis for our existence for our couple for our family created future for world to evolve to improve to exploit as deserved and in the good way we choose, seen the scientific studies attesting that being given a standard average life of 70 years we can talk about, missing human love rights means -20 years and assuring them involves +20 years, and this is also the main way to permit to all persons to accomplish genetic needs and destiny to be too, permitting in this way a world balance.

5. Sleep is also to be protected as life need since all life beings have rest time in all their existence seen when cell take good time with lesser activity to balance the previous time what done, seen that sleep quality is the main feature to get good, seen previous parameters in symbol to be there.

6. And finally extra rewards.

Talking about extra rewards we can talk about any pleasant important basic activity related to couple that permit to have a good daily and life balance, and any other couple help by who can be good in the couple chosen way see sincere will and so on.

## Reward Balance

What we always have to do when we talk about person and reward in practice is to evaluate the right balance of the rewards we are talking about this meaning that:

1. We make an esteem of the lateral reward of the person which crimes faced and solving them then the damages had and getting right compensation then which somatizations lived and how to solve them see symbol.

2 Then we make an evaluation of the rewards at stake and rebalance these according to the new table created the new esteem the new equilibrium to establish and to be.

So, that who was wrong and for how much time is then under the previous threshold level so that who has to get rights in life and symbol needs to be.

## Six Laws to Save People

Like told, the establishment of civil groups is based on the ideation of rules, that assure the maintainance improvement and guarantee basic human life needs.

The NORMA is a rule extracted from an example of life, where order and rights are to be better cfr which new idea we can derive like principle for all.

Then the official political juridical groups start writing LAWS. What is guarantee cfr the safe way to guarantee that:

1. Microdamage, 2017 Dora and faith
2. Every interaction negative toward reward rights is punished by law, see sum of negativity effects
3. Ingiuria diffamazione
4. 1 year jail if someone is not good talking about people
5. Molestation
6. Every action directed vs. person honour means 1 year jail

7. Beatings with hypothetical personal lesions 20 days or years to heal, 3-10 years in jail
8. Life vs. wedding vs. pregnancy vs. believe crimes
9. 4-7 years' jail for expert's evaluations
10. Money crimes
11. Quantities and impact on life needs.

For all these reason, all public and recognised experts professionals, have to signalate and give solutions to re balance such negative criminal condition so to preserve people rights and lifestyle.

## Reward Importance

The main ideas we get from this are also strategies to apply:

1. Reward is personal, the more reward functions are personal for couple, for partner we love, the more our life can like has to be, easier and better.
2. All lifestyle related to couple has to be chosen by couple since it's the only way to guarantee for future conscious genetic choices related to prole (offspring, children) that has to be as couple want, since till 18

or majority year is influenced by parents, greatly, then its again a couple related matter.

3. Wedding is the way to have a safe couple life since it guarantees the reward privacy, and it's also related to best amounts in quality and quantity of happiness in partnership and to longer better life years.

4. The dopa, gaba rate has always resultantly to be the better we can so that if in previous times then followed the need to repair a cellular life damage, dopamine and relaxing equilibrium practice can be a good system to consciously improve.

5. So another good system to have is: get a right calculation taking into consideration what is negative from an electrical (see how crimes in synchro even are risky negative and stressogens (chemical which molecules are activated for which reasons) and any other micro-damage as told, intuible and evincible or demonstrable this balance is basis to understand how to proceed to save and get a better life toward any anti reward condition.

## Perspective for All

Reward is a human right, a life world need, and all related laws are to assure and guarantee so that world can be as we all want.

### OMICS International: Open Access Publication Benefits & Features

#### Unique features:

- Increased global visibility of articles through worldwide distribution and indexing
- Showcasing recent research output in a timely and updated manner
- Special issues on the current trends of scientific research

#### Special features:

- 700+ Open Access Journals
- 50,000+ editorial team
- Rapid review process
- Quality and quick editorial, review and publication processing
- Indexing at major indexing services
- Sharing Option: Social Networking Enabled
- Authors, Reviewers and Editors rewarded with online Scientific Credits
- Better discount for your subsequent articles
