

Waste Recycling Congress 2020 scheduled at Osaka, Japan during July 20-21-2020.

Ajah James Uzoigwe

Founder/President Earth Environment and Climate Care Ambassadors (EECCA), Nigeria, E-mail: jcitycleanersinternational@gmail.com

The “9th World Convention on Recycling and Waste Management” hosted by conference series with the theme “Advocating Waste Disposal and Recycling Practices for Clean and Green Environment”. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received a commendable applaud and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse fields of Recycling and Waste Management.

The conference was initiated with the Honorable presence of the Keynote forum. The list includes:

- Title: Current developments in closing the recycling loop of PLA

Adina Anghelescu-Hakala, VTT Technical Research Centre of Finland Ltd, Finland

- Title: Recycled concrete aggregates from construction and demolition waste in India – CO₂ binding by carbonation

Christian J Engelsen, Stiftelsen for Industriell Og Teknisk Forskning (SINTEF), Norway

- Title: Food waste recycling using black soldier fly larvae

L M Chu, The Chinese University of Hong Kong, China

Conference series is organizing “10th World Convention on Recycling and Waste Management” which is going to be held on July 20-21, 2020 at Osaka, Japan. The conference is going to cover the entire field related to Environmental Sciences, latest research and findings. The Conference will provide a platform where research scholars and students will be able to gain knowledge about new, innovative research and findings from the eminent Scientist, Researchers and Professors.

The conference highlights of Waste Recycling Congress 2020 are as follows:

Recycling – Reduce, Reuse and Recovery, Waste Management Techniques, Environmental Chemistry,

Hazardous Waste Management, E-Waste Recycling, Marine Plastic Pollution, Waste Water Treatments, Paper Recycling, Plastic Recycling, Industrial Waste Recycling, External Recycling & Internal Recycling, Chemical Waste Recovery, Biomass Valorization, Biofuels, Bio-Electrochemical Treatment Systems, Renewable Resources, Bioremediation, Energy from Organic Waste, Environmental impact Assessment, Landfills, Microbial Fuel Cell Technology, Waste Treatment Technologies
