

Dicephalus Twins

Amin El-Gohary M*

Department of Pediatric Surgery, Burjeel Hospital, Abu Dhabi, UAE

Figure 1: Dicephalus twins.

Female Dicephalus, born preterm at 33 weeks gestation to 29 years old prim gravida mother. They had one trunk with one vagina and one anus (Figure 1). They shared one uterus and one vagina and one anus. The twins had sudden unexplained cot death at age of 1 month before they were fully investigated. Parents refused post mortem examination.
