Global Banking Sector

Business administration is nothing but managing the business operations by taking opt decisions, for the optimum utilization of people and other resources in order to achieve set goals and objectives of the business. In general, administration includes finance, MIS and personnel services of the organization. Business management is a scientific body of knowledge, which plays a key role in the day to day administration to succeed in business endeavors.

The Arabian Journal of Business and Management Review (AJBMR) is an open access, peer reviewed international journal that publishes advanced and top quality scientific and academic brilliance related to business and management. The special issue describes about the structural and behavioral aspects of decision making and its role in business management.

Chadha's SWOT analysis on Kuwait banking system discusses about the regulatory affairs and market framework in Kuwait's banking system [1]. Kashmoola analyzed the Stress level among the Dubai students studying in Higher Education Institutes (HEIs) and their decision making capability [3].

Prasad made an empirical study on the Indian supermarkets and analyzed the effectiveness of the training programmes in critical thinking, personal effectiveness and relationship management in retail sector that leads to business Development. The study focused on the retail warehouse workers, retail merchandisers, retail sales clerk and retail stocker and concluded that there is immense need for training of employees in key areas [6].

Zehri et al. analyzed the performance of Banks in KSA during financial distress and he compared the performance of Islamic and Conventional Banks [9]. Dubey et al., studied the impacts and imperatives of mergers and acquisitions from 2000 in countries of Gulf Cooperation Council [8].

Simeone studied the challenges of SME and banks of UAE and Simeone studied Boko haram insurgency in Nigeria relating to church and warfare [10]. Pezzani reviewed the root cause of the Financial-Economic and cultural problems affecting the Italian labor market [4].

This special issue makes significant contribution to the field of knowledge on business management across the globe as it is focusing on multiple dimensions of decision making to reach the set organizational objectives.

Tiwari et al. addressed the challenges in decision making with the help of diagrams and suggested comprehensive solutions to troubleshoot the barriers on the way to decision making [2]. Yan et al. investigated the hospital accreditation from nursing staff perspective to raise awareness and organizational learning promotion [7].
