Editor’s Note on Volume 3 Issue 6

Journal of Pregnancy and Child health is a medical specialty that deals with gynaecology and obstetrics studying about female reproductive organs’ health and management of pregnancy. To reduce mortality rate of mothers and new born, advancement in the fields of Obstetrics and Genecology is highly important.

Journal of Pregnancy and Child health is an international peer reviewed journal that publishes articles related to recent advances in the field of Gynaecology and obstetrics. In volume 3 issue 6 of the journal one research article, one case report and one commentary and editorial were published.

Here it is important to mention that we have a lot of distinctive topics in this Issue and each article comprises esteemed research. May et al. explained on community awareness pregnant women and child health in four North Carolina country [1]. Sivapatham et al. narrated about Otocephaly: Agnathia microstomia synotia syndrome-A case report [2]. Kaya et al. described Hyperemesis gravidarum: Current approaches for the diagnosis and treatment [3]. Maeda and Serizawa reported on non-invasive diagnosis of fetal lung prematurity with GLHW ultrasound tissue characterization [4].
