

Innovations in Diagnosis, Therapeutics and Rehabilitation of Neurological Disorders and Stroke

Pat Quigley

VISN 8 Patient Safety Center, USA

With great pleasure, Allied Academies welcomes you to join the 10th International Conference on Neurological Disorders and Stroke to be held on September 13-14, 2021 in London, UK. Stroke 2021 congregates the eminent scientist, Neurosurgeons, researchers, academics and dynamic experts from healthcare industries around the globe in the field of neurological science.

The vital goal of Stroke 2021 is to build up an efficient platform for the scientists, neurologists, research scholars, principal investigators, and industry experts to exchange their practical experiences in the field of Neuroscience and stroke. This forum will impart meeting and collaboration of the experts in neurology, physicians, researchers, and academics to endeavour new diagnosing techniques, management and prevention of stroke patients.

Stroke 2021 provides a prominent occasion for the scientist and industry experts to exhibit their breathtaking research experiments. The dissolution of ideas and results from the esteemed people in the Neurology field is extremely potential to enhance the differential diagnosis, therapeutics and preventive measures of stroke disease.

Stroke 2021 is organized with 14 tracks of subjects in neurological science to obtain insights on the state of the art techniques being used for addressing the diagnostic and therapeutic issues in neurological disorders and stroke.

Stroke 2021 is exclusive in aggregating healthcare industries and renowned clinical scientist from neurological disorders, mental health, neuropsychiatry, neuroimaging, behavioural neurology, neurosurgery, and stroke rehabilitation & recovery. We hope this event will be an educational and motivational for upcoming researchers and young scientist forums to get interact with prominent experts in neurological disorders.

The location of the conference is a hub of top medical research centres and universities. On behalf of the organizing committee, we proudly invite you to this exciting event in London, UK and hope you will have satisfiable experts and academic interactive sessions.

Stroke 2021 will be organized in such a way to explore the theme Innovations in Diagnosis, Therapeutics, and Rehabilitation of Stroke. This event will give you a book marking your work diary; we are inspiring you to make it possible. Stroke 2021 not only amplifies your practice and knowledge, but it will also contribute an exclusive opportunity to build a network with the broad spectrum of professionals and experts in the field of neurological disorders and stroke.

A neurologic disorder is the dysfunction of any part of the brain or Central Nervous Systems which could result in the physical disability and psychological issues. There are many types of neurological disorders including Parkinson's disease, Alzheimer's disease, Epilepsy, Multiplesclerosis, and Migraines. Even a Nano level destruction in the neurons' structural pathway can have consequences in the functions of the nervous systems. Various causes that stand for neurological disorders are Infections, Genetics, Physical injuries, and Nutrition-related causes.

Stroke is the clog in the blood vessels of the brain as a result of plaque formation due to which the blood supply is cut off. This primarily leading to the cell death and finally, it cause brain injury. The stroke can effect in two possible ways, ischemic due to blocked artery to the brain and haemorrhagic due to the ruptures of blood vessels.

Benefits of attending the conference

The 10th International Conference on Neurological Disorders and Stroke will provide you an excellent platform to have brainstorm idea for diagnosis and management of the stroke as well as the neurological disorders. Stroke 2021 will behold of professionals and experts from around the globe who will demonstrate their innovative research for the amelioration of neurological health.
