Medical imaging a methodical process which gives visual representation of internal form of body and some organs for clinical analysis and medical intervention. Medical imaging aspects to reveal internal structures hidden by the skin and bones. Medical imaging is often apparent to term the usual of techniques that noninvasively produce images of the internal aspect of the body. Imaging for therapeutic purposes includes a group which includes the administration of radiologists, radiographers (X-ray technologists), sonographers (ultrasound technologists), medicinal physicists, biomedical designers, and other support staff working together to optimize the well-being of patients, each one in turn. Appropriate utilization of medical imaging requires a multidisciplinary approach.

The [Medical Imaging 2020](#) is an ideal platform for researchers and decision makers in Medical Imaging and Clinical research to present their latest findings and learn about the advancement in Imaging Technologies and Clinical Researches. Many scientists and renowned experts will be a part of this conference.

**5<sup>th</sup> World Congress on Medical Imaging & Clinical Research, 2019** was inaugurated followed by the keynote session by **Enza Torino** University of Naples Federico II, Italy with the title "Hydrodenticity to enhance relaxivity of MRI contrast agents. The session was Chair by [Enza Torino](#), University of Naples Federico II, Italy.

The GDP is projected to rise by 2.5 percent in 2019, 1.9 percent in 2020 and 1.8 percent in 2021. The Computerized Radiology will be source of strength, with growth of 2.5 percent in 2019 and 3.0 percent in 2020. In fact, Pharmaceutical industry growth will exceed that of the US economy through 2024.

Global Radiology Conferences going to be held during January 2020 to December 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More.!!!
