Sir, Madam,

I am writing to strongly recommend that the *Journal of Vaccines and Vaccination* of the OMICS Group Journals be indexed in PubMed Central.

There have been some remarkable articles published in the journal. These are very useful as references and for studies in the field of vaccination and vaccine research. The editorial board and support staff have worked very hard to produce and publish high quality scientific papers in this journal, and to maintain a high standard of professionalism for the publication.

In its present state, the journal is available as Open Access. However I feel that indexing this journal in PubMed will allow more readers - including medical students, interns and residents-in-training, as well as research scientists - access to these articles to help advance their medical knowledge in the field of vaccination and vaccine research.

Please feel free to contact me regarding this reference and for any other information you may need regarding this journal.

Sincerely,

Alwyn Rapose - MD #1/20/13
