To Whom it May Concern:

The Journal of Fisheries and Livestock Production (JFLP) is a new scientific journal featuring peer reviewed scientific articles on aquaculture, fisheries, livestock production, conservation, and resource management, with a focus towards sustainable use. The journal maintains high standards for its articles and Open Access for its readers. Given the current challenges to the environment, in terms of quantity and quality, and its natural and domestic fauna, knowledge in these realms will be increasingly important to inform aquaculture and farming practices to feed burgeoning global populations while simultaneously minimizing and mitigating impacts to natural resources.

The editorial board and journal staff have worked diligently and consistently for the journal to establish its high professional standing. Given the importance of the topics covered by the JFLP, the nature of its peer review process and hardworking editorial board and journal staff, and its Open Access, I hereby recommend this journal to be indexed in indexing platforms.

Sincerely,

A handwritten signature in black ink that reads "Benjamin J. Clemens". The signature is written in a cursive style with a long horizontal flourish at the end.

Benjamin J. Clemens, Ph.D.
