To Whom It May Concern:

As an editorial board member of Journal of Cancer Science & Therapy (JCST), I am very happy and honored to provide this letter in support of JCST's efforts to obtain indexing in PubMed. JCST is an open access journal that focuses on recent developments and discoveries made in the field of Cancer Biology and Therapeutics and publish high quality manuscripts on timely schedule and much more waiting in pipeline to be published. The journal is well respected in the scientific community and open access means the journal is well accessed and has the potential to benefit scientific communities throughout the world. An indexing in PubMed will further facilitate greater dissemination of scientific information published in JCST and benefit the scientific community even more. I further wish to emphasize that the editorial board members and journal staff have worked very hard for the journal to establish its current high professional standing and wide spread acceptance in scientific community and will further strive to do better in future. I enthusiastically recommend JCST's effort to obtain the indexing in PubMed.
