Rome, 19th July 2013

Dear Sir,

Clinical Microbiology: Open Access is a peer-review journal with open access that publishes original articles on the topic of microbiology, with particular interest in the clinical applications. The journal is relatively young, but very active and proposing in order to offer to its readership high quality information that open up further input for investigations and discussions.

The Editorial Board Members and the Journal Staff have propounded a great deal of work with intense commitment to constantly improve the quality of the journal. Therefore, I sincerely recommend *Clinical Microbiology: Open Access* to be indexed in Pub Med.

Regards,

Cristiano Pagnini, M.D., Ph.D.
