Dear members of the review panel:

This letter of is written to endorse indexing of the Journal of Leukemia in PubMed Central. With this enthusiastic endorsement, I hereby express my great interest in the continued service on the Editorial Board of Journal of Leukemia. I further give my consent to disclose by the Journal my affiliation and contact information.

Since joining the Editorial Board of the Journal of Leukemia, I have seen an impressive rise of high-quality publications and the great enthusiasm for this journal among clinicians, scientists as well as health care givers. The scope of articles published in the Journal of leukemia has been broad reaching in covering all aspects of hematological malignancies, and I commend the excellent Editorial team for their hard work. After working closely with the members of the Editorial office, I can also speak to their other personal qualities. The team is driven and focused in their editorial work. Members of the office have passion for working in a scientific journal, and becoming members of a group that makes a difference in health care and management of disease. Editorial assistants have demonstrated excellent command of the multiple steps of manuscript submission, peer review, editorial review, and journal publications. For this excellent support team, and other prominent members of the Editorial Board, the Journal of leukemia has recently been recognized as a rising star in the field of hematological malignancies.

I strongly recommend that the Journal of Leukemia be indexed in Pubmed Central. I will continue to serve on the Editorial Board and do not have any conflict of interest, which would interfere with this important service for science, medicine, and technology communities.

Please do not hesitate to contact me by phone or email if you have any questions regarding this endorsement.

Sincerely,

*Hatem Sabaawy, MD, PhD*
