National Library of Medicine  
Building 38A - Room 4N-419  
8600 Rockville Pike  
Bethesda, MD U.S.A. 20894

Dear National Library of Medicine,

I would like to express my great interest in continued service in Journal of Stem Cell Research & Therapy as an Author and even as a reviewer. I am writing to you because I would like to give my strong recommendation for indexing this journal in PubMed Central. I also give my consent to disclose my affiliation and contact information by the Journal. I do not have any conflict of interests, which would interfere with this important service for science, medicine, and technology communities.

The Journal of Stem Cell Research & Therapy has emerged as one of the internationally recognized open access journals publishing peer-reviewed stem cell research advances and breakthroughs, which have a high impact on a broad area of biomedical research as well as the general public and which will be of interest to the broad readership of PubMed Central. The editorial board members and journal staff have worked very hard for the journal to establish its high professional standing, and thereby, I am writing in enthusiastic support of this journal to be indexed in PubMed so that most recent publications on ground-breaking stem cell research and regenerative medicine will become instantly available to scientists in diverse basic biomedical research and clinical disciplines as well as the general public.

Sincerely yours,

**GLOBAL STEM CELL  
TECHNOLOGY  
GEENEINDESTRAAAT 1
