Dear Sir or Madame:

It is with great pleasure that I write this letter to endorse the addition of the *Journal of AIDS & Clinical Research* into the Pubmed index. As an Editorial Board Member, I am extremely proud of our multidisciplinary journal that aims to inform a broad audience of clinicians, researchers, academics, students and the lay community about the latest research on HIV/AIDS. Our journal includes findings in the areas of social/behavioral, clinical and basic sciences.

Through original articles, review articles, case reports, and short communications, the *Journal of AIDS & Clinical Research* is able to publish the most innovative, complete and reliable discoveries and current developments in the field of HIV/AIDS. Our rigorous peer review process ensures that the research is sound and will make a significant contribution to the literature. Importantly, the *Journal of AIDS & Clinical Research* is an Open Access journal. Thus, our articles are freely available online without any restrictions or any other subscriptions to researchers worldwide.

In conclusion, the editorial board members and journal staff have worked very hard for the journal to establish its high professional standing and there by recommending this journal to be indexed in PubMed. Please do not hesitate to contact me if you need any further information.

Sincerely,

John K. Williams, M.D.
Associate Professor
UCLA, Department of Psychiatry & Biobehavioral Sciences
