

## Recommendation Letter

To,  
**National Library of Medicine**  
**Building 38A - Room 4N-419**  
**8600 Rockville Pike**  
**Bethesda, MD U.S.A. 20894**

I am an associate professor of Shanghai Jiao Tong University, and the vice director of Department of Nuclear Medicine, Shanghai Sixth People's Hospital.

Thyroid is considered to be the largest endocrine gland. Disorders related to thyroid are hyperthyroidism, hypothyroidism, thyroid cancer, etc. Journal of Thyroid Disorders & Therapy provides information regarding the types of thyroid disorders, tests for detection, therapies to cure and prevention strategies. The journal includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing. Journal of Thyroid Disorders & Therapy is an Open Access journal and aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of original articles, review articles, case reports, short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide.

The editorial board members and journal staff have worked very hard for the journal to establish its high professional standing and thereby recommending this journal to be indexed in PubMed.

Sincerely,

Libo Chen, MD & PhD
