To Whom It May Concern:

I strongly recommend that the Journal of Community Medicine & Health Education be indexed in PubMed Central.

In my experience with the Journal staff, I have found them to be professional and hard working. The editorial board provided reviewers for the manuscript that I submitted that were helpful and supportive. Overall in my experience those associated with the Journal of Community Medicine & Health Education have developed a professional product that disseminates health research in an open and equitable way. PubMed Central indexing would expand the reach and impact of the research in the Journal and would continue to increase the quality of the submissions. Overall I feel that this would be a benefit for the research community at large.

Sincerely,

Martine Hackett, Ph.D., MPH
