**Suggestion or proposal:**

Best wishes to the journal for publication of quality articles in the field of diabetic research. I would like to mention that Journal of Diabetes & Metabolism targets a very important area of research and is deemed to be very promising. It is important to make it SCI indexed so that to have official journal impact factor in order to attract better submissions. One way to do this to get request board member to contribute good quality papers and in the meanwhile the publishing group waive part of the processing fee for the invited submissions from board members.
